

IT'S HERE!

Introducing ... our new kitchen!

We've said it a lot this past year: the kitchen is the heart of our home. But our heart hadn't been doing so well, which is why we came to you with a dream: a new kitchen for our residents.

Thanks to your generous donations, that new kitchen is now a reality! You have enabled urgently-needed renovations and helped to purchase new, more efficient appliances. You should see the transformation! This formerly old, rundown space is now warm and inviting.

The Interval House kitchen feeds up to 30 people several times day with little downtime. That's why it's so important it runs smoothly and efficiently, without creating huge messes (like our old grease trap) or wasting food (like our old unreliable fridge and freezer).

Most importantly, the new kitchen is a welcoming space for women and children. It's a place where moms can make lunches for their kids, where new friends can sit

and encourage each other over a cup of tea, and where self-confidence can grow as residents take turns making meals for each other.

Now that our new kitchen is up and running, our whole home is filled with the sounds and smells of cooking and laughter—just like a home should be. From the bottom of our hearts, thank you for healing the heart of our home!
